## **Exhibition: BEST HIGHRISES 2018/2019 – The international highrise award 2018**

Date  
07.11.2018

Our project Marina One is part of the exhibition BEST HIGHRISES 2018/2019 – The international highrise award 2018. Every other year the International Highrise Award is bestowed on an outstanding building displaying extraordinary aesthetics, trailblazing design as well as innovative technology and economic efficiency. From the 36 buildings worldwide nominated by DAM, the international jury chose five finalists and ultimately the winning building. The exhibition presents all the nominated structures — and we are honoured to be a part of it. Marina One in Singapore is to date the largest project by ingenhoven architects. The project was officially opened on 15th January 2018. As an international role model for living and working, Marina One makes an innovative contribution to the discourse on mega-cities, especially in tropical regions, which, in the context of increasing population and climate change, face enormous challenges.

The high-density building complex with its mix of uses extends to over 400,000 square meters and, with its group of four high-rise buildings, defines the Green Heart—a public space extending over several stories. This three-dimensional green oasis reflects the diversity of tropical flora.

**Exhibition Period:**  
November 3, 2018 – March 3, 2019

**Exhibition venue:**  
DEUTSCHES ARCHITEKTURMUSEUM  
Schaumainkai 43  
60596 Frankfurt am Main
